

Trophy Bleaching Powder

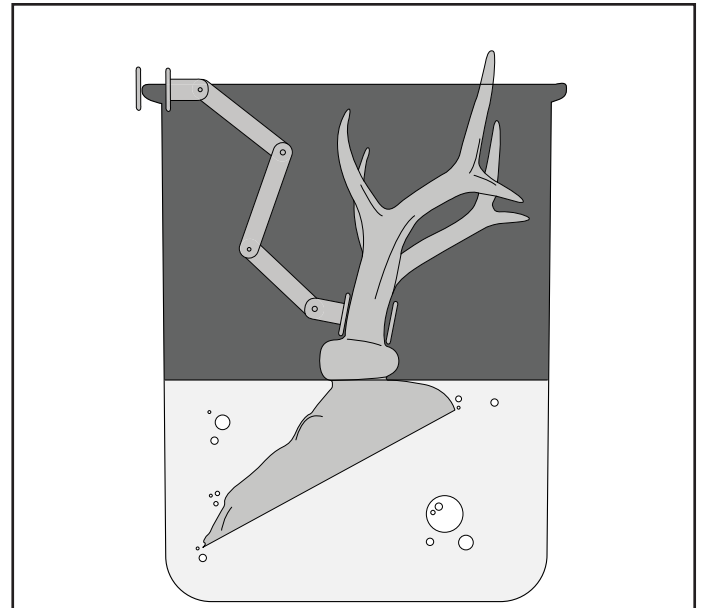

Instructions For Use

For Roe Deer

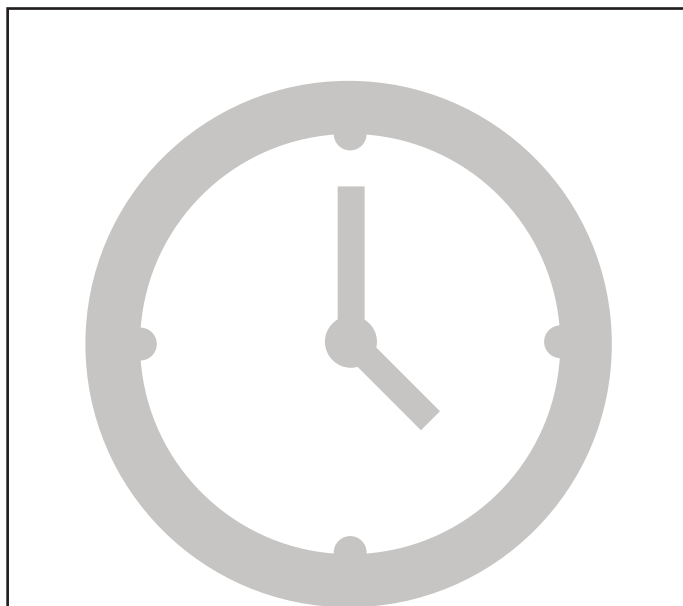

1

Add 2 level tablespoons of trophy bleaching powder per 300ml of cold water.

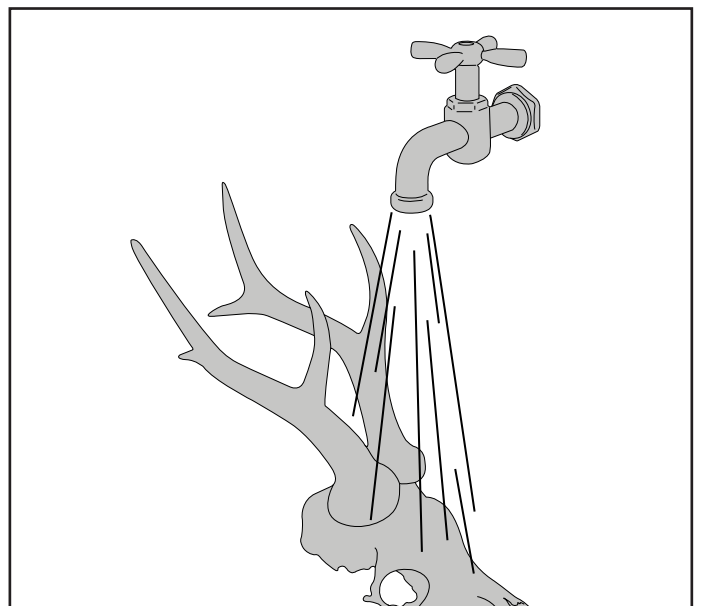

2

Dip the skull into the water making sure to keep the antlers out. Slowly heat to *nearly* boiling and let cool again. We recommend using the Boiling Clamp (**Code: 353801**).

3

Leave for 15 hours.

4

After this time the trophy is ready to be rinsed with water. If required process can be repeated.
