

Upright Sausage Stuffer

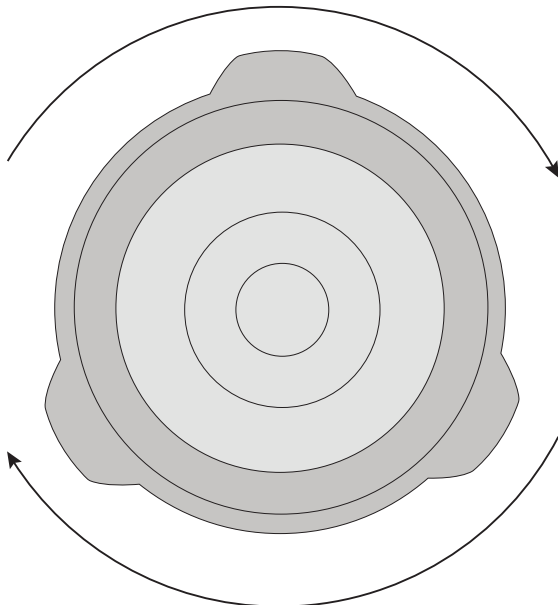

Assembly Instructions

1 To add meat to the stuffer crank the plunger up to the top. The cylinder will dip. Add meat to the top.

2 The stuffer has two gear speeds. One high speed to quickly move the plunger; the other a slow gear to force the meat out.

3 To replace the size of sausage. Unscrew the front take out the previous size and replace with required size.

Cleaning

To clean the stuffer, crank the plunger up to the top and remove the cylinder from the housing.

Unscrew the front and remove all parts. Including the cylinder, plunger and funnels

Wash the parts in warm soapy water.

Dry the parts and place on a wooden or plastic surface to dry to ensure that the metal doesn't rust

Once the metal has dried, coat the inside with vegetable oil or olive oil to prevent rusting.
